<tr>
<td><em>Artic Win Vision 2.0</em></td>
<td>*Screen reading software for Windows™</td>
</tr>
</tbody>
</table>
*Business Vision 2.0  *A DOS based screen reader for use with Artic or DECTalk synthesizers which are purchased separately.

*Business Vision Omni  *Screen reading software for third party speech products.

*Win Vision Solo  *Screen reading software for Windows™ that works without Business Vision.

**Note-Taker/Personal Data Assistant Speech Synthesizers**

*Artic TransType  *A talking notetaker with spell checker and personal data organizer, based on a mini-QWERTY keyboard with minimal keys and standard spacing. Has an extended keyboard option for number-cursor keypad. Memory is provided through a slide-in cartridge.

*Artic Trans Type Deluxe  *Same as above with better speech and increased memory.

*Artic TransBook  *A portable book file reading computer with speech synthesis. Documents can be downloaded into the TransBook RAM disk or Micro Flash data cards and read anywhere using the navigation keypad.

**Battery Operated Portable RS-232 Speech Synthesizers**

*Transport Classic w/Vest  *A battery operated, portable speech synthesizer with special features.

*Mini TransPort w/Vest  *Miniature synthesizer with Flash Disk and special features.

*DECTalk PC  *Serial DECTalk speech synthesizer (no special features).

**Internal PC Speech Synthesizers**
*SynPhonix Basic w/TTS  *Generic speech synthesizer for third party software.
*SynPhonix Classic w/Vest  *Special speech synthesizer requires Business Vision.
*SynPhonix Deluxe, AdVEST  *Advanced Universal synthesizer for Vision and other screen reading programs.
*DECTalk PC  *DECTalk 4 to be combined with screen reading programs.

**Options and Accessories**
*Artic Gizmo II Pad  *That Pad is a multi-function external keypad designed for use with Artic’s speech-based screen access (Visions). With the Gizmo the entry screen can be navigated and read in a directed manner.

**Text Enlargement for DOS and Windows™**
*Artic Magnum GT  *Basic 8x text enlargement for DOS & Windows™ 3.1.

<tr>
<td><strong>Braille Embossers</strong></td>
<td></td>
</tr>
</tbody>
</table>
| *Braille Blazer | *Braille embosser/printer that prints on light-weight paper or Braille paper (tractor
feed). Features a plastic mode for production of Braille signs and labels. Also prints in sideways mode. Blazer can accommodate computer paper, small items such as tractor-fed index card, labels, etc. Prints 15cps in 6 or 8 dot Braille. Size 15”X10”x5”. Weight approximately 12 lbs.

*Braille BookMaker
*Produces interpoint Braille. Prints on tractor-feed paper 20-100 lb. paper, adhesive backed plastic or light metal foils. Produces interpoint Braille at 80cps. Text can be embossed either vertically or horizontally on the page. Size 21-1/4”x18”x8-3/4”. Weight 52lbs.

*Braille Express
*High-volume commercial Braille production. Operates at 150cps. Generates approximately 500 pages in 1 hour. Also stores 500 page file. Has same features as BookMaker but produces Braille twice as fast.

*ETgraphX
*Converts conventional images from PC into tactile graphics. Operates w/any MS-DOS 2.0 or higher compatible computer with a standard CGA, EGA, or VGA graphic adapter. With a drawing program such as Paintbrush IV or a scanner, it can produce image as a Braille graphic.

*pixCELLS
*Braille Graphics used with Apple II and any Braille embosser. Allows user to create Braille graphics from scratch. Also works with proDOS files, pixCELLS automatically converts DOS 3.3 files to proDOS.

**Speech Synthesizers**
*Accent Series
*Messenger-IC
*Audapter Speech System
*Double Talk PC
*DECTalk PC
*DECTalk Express
*Lite Talk
*The Sounding Board

**Specialized Software:**

*Easy-Braille Translator*  *Designed for use with the Braille ‘n Speak, Braille Lite or Type ‘n Speak, which translates ASCII text file into formatted Grade 2 Braille.*

*Checkbook Program*  *Electronic checkbook register for use with Braille ‘n Speak, Braille Lite, or Type ‘n Speak.*

*Braille-Term Program*  *Combined with Braille ‘n Speak, Braille Lite or Type ‘n Speak to provide on-line speed, flexibility and access. Features include 50-entry dialing directory, auto-dial for re-dial, Hayes-compatible modem control, ability to save messages from on-line services into a separate log file, and a set-up menu with user-adjustable parameters.*

*PC Master*  *DOS software which allows the Braille ‘n Speak, Braille Lite, or Type ‘n Speak to take the place of the computer keyboard. Grade 2 Braille can be typed directly into your word processor or editor. The reverse translator and typing in Braille allow regular print characters to be entered into the computer.*

*Windows Master*  *Software that allows speech and Braille access to Windows™ on a personal computer through Braille ‘n Speak, Braille Lite, or Type ‘n Speak.*

**Special Devices**

*Temp Talk*  *Talking thermometer.*

*Audiocalc*  *Talking scientific calculator.*

</tr>
</tbody>
</table>
**Refreshable Braille Terminals**
*Alva Braille Terminals*  
*All versions have eight-dot Braille cells.*  
Portable Models:  
*23 and 43 Braille cells.*  
Desktop Models:  
*45 and 85 Braille cells.*

**Graphics Tablet**
*Nomad*  
*A touch-sensitive board on top of which raised letter graphics or pictures can be placed. It plugs into the serial port of an MS DOS computer which has a speech board. As the user presses different parts of the graphic the Nomad announces what has been pressed (e.g., as you press a state on the map of the U.S. it would tell you the name of the state).*

**Electronic Mobility Aids**
*Mowat Sensor*  
*Small hand-held sensor device that can be used as an orientation and navigation aid. It has rechargeable batteries that last 8 hours or the sensor will operate on transistor batteries. It has two ranges: one for indoor situations and one for long range settings.*

**Computer Accessories**
*Eye Relief*  
*Large print word processing software.*  
*VisAbility*  
*Enlargement software requiring a scanner.*

**Low Vision Products**
*ClearView 2000 CCTV*  
*B/W and color 14”, 17”, and 20” (side-by-side unit only).*  
*Clear View Classic*  
*B/W with a flat screen. Low cost model.*  
*Viewpoint VGA*  
*3 portable CCTV models that incorporate a hand-held CCD camera. Options include: VGA Handwriting stand and computer compatibility.*  
-VPW  
*VGA Mono 14” b/w.*  
-VPC  
*VGA Multi 14” b/w with 8 selectable colors.*
*VGA Mono 19” can use varying size monitors up to 32”.

**Braille Notetakers and Refreshable Braille Displays**

*BrailleMate 2*  
*A hand-held Braille notetaker featuring a Braille keyboard, one 8-dot Braille cell, and standard built-in speech synthesizer. The BrailleMate 2 comes with 2 MB Flash Memory. It includes a word processor, calculator, clock, phone book, appointment book, ASCII terminal mode for on-line interaction with another computer or data service and supports modem or direct connection. It also allows for larger Braille display options through connection with PowerBraille 40 or the Navigator refreshable Braille systems with output in 20, 40, or 80 character formats.

*Braille Mate 2+2*  
*Same as above, except the BrailleMate 2+2 comes with 4 MB Flash memory.

*Braille Power 40*  
*PowerBraille 40 is a battery powered computer access refreshable Braille display, which is compatible with notebook and desktop computers. It translates computer screen information into 40-cell 8-dot Grade 2 refreshable Braille.

*Navigator 80*  
*Navigator 80 is a computer access refreshable Grade 2 Braille display with 80 cells in 8-dot Braille.

**Braille Displays Integrate with Keyboards (INKA)**

*INKA Basic*  
*An Integrated Keyboard Access which utilizes a standard QWERTY keyboard integrated with a 40+4 cell Braille display. INKA loads driver software directly into a computer and plugs into any keyboard port.

*INKA Pro*  
*Same as above but includes the following options: speech synthesizer, additional 12 Braille elements and VISION, SWING, and Cursor Star software. Additional options are also available.

**Tactile Reading Devices**
*Optacon II System

*The Optacon II is a tactile reading device that consists of three major components: the camera, a control unit and a tactile array. It converts regular print or computer output into an enlarged, vibrating, tactile form. To read print, the user moves the camera across a line of print with one hand while the index finger of the other hand is placed on the tactile array. As the camera moves across the letter in the line, it is sent to the device electronically to produce an image on the tactile array by 100 vibrating rods.

*Braille Notebook Computer

*David 90 (486)

*A PC designed to incorporate all available access technologies into a single package, including tactile Braille, and synthetic speech. David is designed around the Intel 486SL processor operating at 25MHz and features 6MB RAM with compatibility to increase to 8 MB RAM maximum, a 120 MB hard disk, 1.44 MB diskette drive, serial and parallel interfaces. Its tactile, refreshable Braille display is composed of 40 8-dot Braille cells, plus an additional four Braille cell status attribute display. It provides (OSP) Optical Sensor Pointer technology for display navigation, cursor routing, and other functions. The OPS serves as a “Braille Mouse.” Synthetic speech function also operates in parallel with the Braille display. It has a menu-driven configuration program, a 16 key pad used to control as many as 15 layers of commands, which provides 240 user-definable functions. David runs most standard software, but also includes it’s own memory-resident desktop such as: text editing, database, mailmerge, communications, notepad, calculators, clock
and calendar. David System 90 has been designed to run Windows™ applications without hardware modifications. Other models and options available.

**Screen Reading Programs**

*Screen Power  *Screen reading for Speech 2.0 PC-DOS or MS-DOS only.

*Screen Power Braille  *Braille 2.0 provides Braille access with the PowerBraille 40 refreshable Braille system.

*SPWin  *Screen reader for Windows™ 3.1 (Note: Windows™ 95 available January 1996).

**Optical Character Recognition**

*OsCaR  *OCR software for DOS only.

**Braille Embossers**

*Versapoint  *Provides the following features: 6 or 8-dot Braille, sideways printing available, Grade 1 and 2, foreign language, continuous form tractor feed only, 40 characters per second, and 30,000 character buffer. Weight 45 lbs.

*Porta Thiel  *Provides the following features: 6 or 8-dot Braille, single sheet continuous form, 10 characters per second, serial and parallel interfaces standards. Weight: 9.9 lbs. (4.5 kg).

*Beta 3x  *Provides the following features: 6 or 8-dot Braille, 130 characters per second, Grade 1 and 2 available, notation and mathematics script. Weight: 84 lbs.

*BAX 10  *Used primarily for professional Braille publishing.

**Text Enlargement**

*Vista VGA  *Text enlargement program that is both software and hardware based. It is controlled through the Vista mouse.
CCTV’s
*Vantage  *A 14” B/W monitor with reversed polarity. It has a tilt screen display with a reading table.

*Chroma CCD  *Color CCTV available in two monitor sizes, 13” which magnifies up to 45 times or the 20” which magnifies up to 60 times.

*Automated Viewing Table  *Used with Chroma CCTV. Automatically moves source materials under the scanning area of the CCTV System. Directionality is supplied by a foot control or joy stick hand control.

*VersiColor  *Offers 24 customized foreground and background combinations. It magnifies up to 45 times and the monitor has tilt and swivel capability.

*Aladdin  *A CCTV in b/w only. A stand alone system at low cost.

</table>
| *Voxcom Message Recorder  *An inexpensive way to record messages on cards with tape, which can be used as temporary reminders or as permanent records. The cards which have magnetic tape strips, can be passed through the recorder to record messages or play them back. The magnetic strips can be erased for re-use. A voice record can also be obtained by using the VOXCOM with adhesive talk/tape pasted on the backs of checks, insurance policies or any other important paper or items.
